About

I'm Gabriel Rachiteanu, also known as etaloot. I build web and mobile experiences with React, Next.js, TypeScript, React Native and Flutter, backed by Node.js and Laravel. My work includes personal products, creative websites and client projects.

Technical skills

Web & interaction

React / Next.js · TypeScript · Tailwind / SCSS · GSAP / anime.js

Mobile

React Native · Flutter · Progressive Web Apps

Backend & data

Node.js · Laravel / PHP · MySQL / Firebase · REST APIs

Tools & Workflow

Git / GitHub · Docker / Linux · Vercel · Figma

Selected work

Remember → 2026

Founder · Full-Stack Developer · Next.js / React / PWA / TypeScript

A personal SaaS that maps your identity through numerology, astrology and rare archetypes. A self-funded project built end-to-end as a Progressive Web App with offline support and an editorial, cinematic dark UI.

https://remember-red.vercel.app/

Inhouse Studio → 2025

Frontend Developer · React / GSAP / Tailwind CSS / Animation

A bold, motion-rich website for a creative design studio showcasing branding, digital design and art direction work. Built with immersive animations and a refined editorial aesthetic.

https://inhouse-studio.ro/

Snobbish → 2024

Frontend Developer · React / Tailwind CSS / E-commerce / Responsive Design

A restaurant website bringing together a browsable food menu, product photography, prices and access to online ordering. A responsive interface designed around discovering the menu.
